- Teamwork
- Communication
- Problem-solving
- Adaptability
- Time management
- Work Ethic

## *PROFESSIONAL EXPERIENCE*

**Android Developer**                                     Dec 2017– Nov 2018
Web Clinical Works, Surat, Gujarat, India

- Created, tested, debugged, documented and implemented Mobile application.
- Collaborated with the client to deliver the most feasible and effective solutions.
- Optimize the interfacing of the apps with a variety of systems to ensure flexible and agile use.
- Coordinate with team members to create client apps in an efficient and timely manner.
- Ensure that apps are tested to meet total performance requirements.

# *PROJECT*

## Industrious Diamond
Website and Android Mobile Application

- Technologies :- Android, PHP, MySQL, HTML, CSS, BOOTSTRAP
- The main aim of the Project is to let the user know the information about diamond trade such as diamond price, design and trade.
- In this Project (System), the Front-end is in HTML (Hypertext Markup Language), CSS (Cascading Style Sheets), BOOTSTRAP and the Back-end is in PHP.
- Recommendations of diamond trade will be given to users based on diamond latest price, design, and market.
- The need to develop this Project is that people are still unaware of the Diamond trade. This website will update them about the latest diamond market.

## FoodFinder
Android Mobile Application

- Technologies :- PHP, BOOTSTRAP, CSS, HTML, Java, Android, MySQL
- This system is used to find the different restaurants and provide ease to the customers to order favorable food-items from anywhere and at any time through the website or mobile application and enhance the services of the food industry and help them to grow their scope.
- FoodFinder system where the registered customer can order the food from the registered restaurants available and can get an easy door-step delivery.

## BookStore
Android Mobile Application

- Technologies :- Android, SQLite
- BookStore has a wide variety of new books at incredibly low prices.
- We believe that bookstores are essential to a healthy culture.
- They're where authors can connect with readers, where we discover new writers, where children get hooked on the thrill of reading that can last a lifetime.
- They're also anchors for our downtowns and communities.

**BestShoes**
Website

- Technologies :- HTML, CSS
- A shoe is an item of footwear intended to protect and comfort the human foot.
- Shoes are also used as an item of decoration and fashion.
- The design of shoes has varied enormously through time and from culture to culture, with appearance originally being tied to function.

**TicTacToe**
Website

- Technologies :- Java
- Tic tac toe is an amazing and easily expandable project. Let players choose their symbol.
- Tic-tac-toe is a two player game. The two players take turns putting marks on a 3x3 board.
- The player who first gets 3 of his/her marks in a row (vertically, horizontally, or diagonally) wins the game, and the other loses the game.

**BookLife**
Website

- Technologies :- HTML, CSS
- BookStore has a wide variety of new books at incredibly low prices.
- We believe that bookstores are essential to a healthy culture.
- They're where authors can connect with readers, where we discover new writers, where children get hooked on the thrill of reading that can last a lifetime.
- They're also anchors for our downtowns and communities.

## *CERTIFICATES*
